The AVA10M30RF Steam Radiator Valve Actuator is a wireless, battery-powered thermostatic radiator valve actuator that opens and closes standard steam radiator valves to precisely control room temperature. Up to six actuators can be controlled by an AWRT10RF Wireless Radiant Thermostat to maintain room temperature at the point where the thermostat is mounted. As part of the SALUS wireless system, the optional internet connection allows individual radiators to be controlled from the SALUS Smart Home application on a Smartphone, Tablet or PC. Designed for flexibility and reliability, the AVA10M30RF valve actuator also includes a manual override function

Features	Specifications				
<ul style="list-style-type: none"> • Fits most standard radiator valves <ul style="list-style-type: none"> - Adapter for non-threaded radiator valves • Battery-powered wireless communication • Optional internet access to control room temperature • Valve control based on room temperature • On/Off, Automatic or Learning control modes • Manual override • Over 1 year battery life with low battery indication 	Model	AVA10M30RF Steam Radiator Valve Actuator			
	Package Dimensions	<i>Length</i>	<i>Width</i>	<i>Height</i>	<i>Weight</i>
		3.00"	2.40"	3.60"	5.31 oz
		76 mm	61 mm	91 mm	151 g
	Materials	PC ABS Plastic – Composite Plastic (knurled nut)			
	Approvals	FCC, Industry Canada, CE			
	Operating	32 to 122°F (0 to 50°C), < 95% RH, non-condensing			
	Storage	-4 to 140°F (-20 to 60°C), < 95% RH, non-condensing			
	Power	2 x AA alkaline batteries, 14 months battery life			
	Radio	802.15.4 radio (2.54 GHz), Zigbee HA1.2 based protocol			
	Warranty	5 years limited
