

# Temperature Sensor

SS909ZB

**The SALUS SS909ZB Temperature Sensor connects wirelessly to the SALUS Smart Home automation system, providing temperature data to associated devices**

- Monitor ambient temperatures from a smartphone, tablet or PC
- Multiple thermostats can be associated with a single Temperature Sensor to allow multiple heating or cooling units, such as fan coils, to service a single area
- Small, compact design can be mounted on a wall or placed on a surface with the included stand

## Description and Features

The SALUS SS909ZB Temperature Sensor provides room temperature feedback to the SALUS Smart Home system and associated devices

- Override thermostat's internal sensor to maintain a specified temperature away from the thermostat. Move temperature sensors to maintain desired temperature at any location
- Multiple thermostats can be associated with a single Temperature Sensor to allow multiple heating or cooling units to service a single area
- Program alerts to let you know if temperatures reach target values
